

# MUHAMMAD UMAIR RASHEED

## MERN Stack / Full Stack Web Developer

Rahim Yar Khan, Pakistan (open to relocate) | [umairwarind360@gmail.com](mailto:umairwarind360@gmail.com) | +92 302 1296089

GitHub: [github.com/UmairWarind2000](https://github.com/UmairWarind2000) | LinkedIn: [linkedin.com/in/muhammad-umair-rasheed-5085751a6](https://linkedin.com/in/muhammad-umair-rasheed-5085751a6)

### SUMMARY

Full stack developer with ~2 years of hands-on MERN stack experience building and shipping production web applications — from RESTful APIs and relational/NoSQL data models to third-party integrations (Stripe, Shopify Admin API, Google OAuth), real-time features (Socket.io), and background job processing (Redis/Bull). Final-year IT student with a solid grounding in OOP and the SDLC, comfortable across the full stack from responsive React UIs to Express/Node services and deployment. Currently leading end-to-end development of a live freelance client platform. Looking to bring that same ownership to a Junior Full Stack Developer role.

### TECHNICAL SKILLS

|               |                                                                                                                           |
|---------------|---------------------------------------------------------------------------------------------------------------------------|
| Languages     | JavaScript (ES6+), HTML5, CSS3                                                                                            |
| Frontend      | React.js, Redux / Redux Toolkit, Responsive & Mobile-First Design                                                         |
| Backend       | Node.js, Express.js, RESTful API Design, JWT Authentication, Role-Based Access Control                                    |
| Databases     | MongoDB & Mongoose (incl. Atlas Vector Search), PostgreSQL, Prisma                                                        |
| Integrations  | Stripe (billing & webhooks), Shopify REST Admin API, Google OAuth 2.0, Google Gemini API, Cloudinary, Resend / Nodemailer |
| Infra / Tools | Docker, Git & GitHub, Redis, Bull queues, Socket.io, Railway, Vercel, Render                                              |
| Concepts      | OOP, SDLC, MVC Architecture, Debugging & Testing, Agile Collaboration, Code Review                                        |

### EXPERIENCE

#### Freelance Full Stack Developer — Self-Employed

*Present*

- Leading end-to-end development of a MERN multi-vendor dropshipping platform for a live client, from requirements gathering to architecture: role-based routing (seller / admin), feature-based module structure on the backend, and a shared React app on the frontend.
- Designed and built a crypto-wallet based payment confirmation flow with manual admin confirmation, a pending-order/funding workflow, and an automated email-notification system covering registration, approvals, and order-status changes.
- Integrated Cloudinary for CNIC/product images, and structured MongoDB/Mongoose data models to support 1,000+ sellers and a shared product catalog at scale. on-site frontend matching a TikTok-Shop-style layout, re-skinned for the client's own branding.

#### MERN Stack Developer — Mercury Sols

*Dec 2025 – Jan 2026*

- Developed and maintained features for MERN-based client applications, contributing to both frontend (React) and backend (Node/Express) features under senior guidance.
- Built and consumed RESTful APIs, worked with MongoDB data models, and participated in debugging and code reviews to ship changes reliably.

#### Web Developer — CodingSolution24

*Jan 2024 – Nov 2025*

- Developed responsive web applications using React and modern JavaScript, focusing on reusable components and clean UI implementation.
- Created backend functionality and REST APIs with Node.js and Express, integrating MongoDB for application data and user management.
- Worked on debugging, feature development, API integration, and performance improvements across multiple web projects.

## FEATURED PROJECTS

---

### Multi-Vendor Dropshipping Platform

*MERN, Cloudinary, Nodemailer*

- **Two-panel platform (Seller Portal + Admin Panel)** with role-based routing from a single React app, and a feature-based Express backend (auth, sellers, admin, products, orders, payments, notifications).
- **Core features:** admin-side product CRUD, seller sourcing/outsourcing requests, wallet-based payments, and a statistics dashboard.

### StorIQ — Multi-Tenant Shopify SaaS

*MERN, Stripe, Bull/Redis, Shopify API*

- Multi-tenant SaaS integrating Stripe billing & webhooks, the Shopify REST Admin API, Bull/Redis background job queues, and the Google Gemini API, built across 8 development phases and deployed on Railway/Vercel/MongoDB Atlas.

### Docly — RAG Document Intelligence Platform

*React 19, Node/Express 5, MongoDB Atlas Vector Search*

- Retrieval-augmented document Q&A platform using MongoDB Atlas Vector Search, the Google Gemini API, and Socket.io, with email verification, Google OAuth sign-in, and Docker-based deployment on Railway/Vercel.

### Career-Forge — AI Career Readiness Platform

*FastAPI, React, PostgreSQL/Supabase, MongoDB, ML*

- AI-driven career readiness platform with a FastAPI/Python backend, React frontend, and dual-database setup (PostgreSQL via Supabase, MongoDB), built as a Final Year Project, using Sentence-BERT for semantic matching, a Q-Learning/MDP model for personalized recommendations, spaCy for NLP, and the JSearch API for live job data.

## EDUCATION

---

**BS Information Technology — KFUEIT**

*2022-2026*
